

## Zoom Boom Attachments

Zoom Boom Attachments - In the new millennium, Skyjack was bought by the Linamar Corporation, who is LNR on the TSX, a leading maker of modules, assemblies and precision-machined components. At present, Skyjack has manufacturing plants in Canada, Hungary and the US with added support offices in Asia and Europe.

Skyjack became the industry leader of aerial hoist machinery by combining features like for instance durability, quality and serviceability, making their scissor lifts recognized all around the globe for product efficiency and reliability. Skyjack proudly makes a full line of self propelled scissor platform lifts. Their elevated work heights reach about fifty six feet. The company's existing Boom hoist model series has telescopic booms starting from forty five feet to seventy one feet. Skyjack has plans to further expand their boom lift truck product line. The company remains a dominant player in the industry adapting fast to the continuously evolving needs of all of their clients.

Of late, Skyjack bought Carelift Equipment in August of the year 2007 and Volvo's Material Handling Equipment to be able to try to expand their Telehandling product offering. The resulting Zoom Boom and VR series telehandlers together with the extra manufacturing capability further guarantees the company's success and growth.

Skyjack is proud of their commitment to engineer reliable lift solutions. Their products are made, supported and sold all around the globe.
