

Electrical Parts for Forklifts

Forklift Electrical Parts - Forklifts could be specifically marked for use in hazardous sites. A labeled lift truck denotes the design has met the least standards of ANSI/UL 558 intended for engine powered forklifts or ANSI/UL 583 intended for electric trucks for the type of label put.

Applications for labeled trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance provider and Fire Marshall for further info concerning the permitted uses of industrial powered forklifts in your application.

If the specific forklift satisfies the outlined criteria, labels could be put. A labeled lift truck will show the type of designation put on the nameplate and would have a properly corresponding label placed.
