

Clark Forklift Part

Clark Forklift Parts - Performing globally, there are now 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in commission in North America. Clark has five main lines of forklifts across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual items fabricated for 20 exclusive designs of forklifts and automated equipment. Your regional Clark Dealer is your complete source for availability of all your components needs provided by Clark Totalift.

Clark features a extraordinary Parts Supply team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Motivated to provide the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

Clark proudly remains an progressive leader of the material handling industry, pioneering protection features such as the worker restraint system. This exceptional commitment to safety is at this time a standard feature on every lift truck.

Clark has a relentless mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production facilities. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has selected the system of "Lean Production" at all of its assembly facilities for the reason that this system is particularly economical and permits minimal use of resources. Established to guarantee maximum efficiency, this system is designed to discover and acknowledge the most effective methods for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to upgrade the effectiveness and brilliance of their products while minimizing expenses. The contemporary value engineering agenda combines progressive product growth and offers improved client support and service within the industry.
