Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The forklift product line remarkably features 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various truck models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest rising forklift and lift truck company in the North American marketplace, thanks to its outstanding level of product performance and their persistently high level of buyer support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division situated in Cleveland has a expert team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a home-based equipment expansion venture. Sales of these goods were primarily targeted to state-run companies, large scale organizations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of considerable growth of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a global sales system and started exporting designs they had developed through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international marketplaces.
